

# BorNiGuard

## FOR WELDING, CUTTING, STAMPING

# CERAMIC SPATTER GUARD

BorNiGuard ceramic coating prevents unwanted spatter for several uninterrupted hours. This fast durable ceramic film offers superior protection, increased productivity, and cleaner welds and cuts compared to consumables from welding supply stores.

- Far less cleaning and downtime
- Extend MIG tip and nozzle life
- Reduce need to clean jigs, cables and fixtures
- Extend life of cutting tips

### METAL CUTTING TIPS

- Apply to oxy-fuel, plasma or laser cutting tips

### MIG WELDING

- Apply to tips and nozzles for clean continuous welds and less downtime
- Apply to welded part to prevent spatter

### FIXTURES, JIGS, & FITTINGS

- Apply to fixtures and jigs for reduced clean up time
- Spatter can be easily brushed off

### PLASMA & LASER CUTTING

- Coated slats last longer, better planarity
- Coat tips for uninterrupted cuts and less downtime
